

clubraX™

clubrax™

maximum display for maximum sales

Durable Clubrax™ is manufactured from injection moulded polypropylene and nylon. Clubs are displayed in a head up position for brand identification and easy removal and replacement. The unique hooking mechanism not only displays clubs individually for easy inspection, but also prevents would be thieves from snatching an arm full of clubs.

Able to accommodate any shape or size golf club, Clubrax™ has a locking clip that stops movement along the wall. Clubrax™ can be used to display other items such as fishing rods and pool cues if needed.

Features and Benefits

All clubs are displayed “heads-up”

- Customer can see manufacturers branding immediately
